# Observações sobre a arte de desenhar insetos

No século 17, a alemã Maria Merian se propôs a investigar o mundo dos insetos. Acabou desenvolvendo uma forma diferente de pensar e enxergar a natureza e, aos 52 anos, partiu para uma perigosa aventura na América do Sul, para detalhar os ciclos de vida de borboletas, mariposas e outros insetos.

Os feitos de Merian, numa época em que pouca gente desbravava o continente americano abaixo da linha do Equador, deram a ela a fama de primeira ecologista do mundo.
